PROFILE

A dedicated Flutter developer eager to embark on my journey in the world of app development. I bring enthusiasm, a solid foundation in Flutter, and a commitment to learn and grow while contributing positively to your projects. I specialize in not just meeting technical requirements but in crafting applications that align with your business objectives, ensuring a digital strategy that stands out in the market.

PROJECTS

- **Flutter Chat Application**
Developed a real-time chat application using Flutter and Firebase, enabling users to send and receive messages instantly.
- **Flutter Ecommerce Application**
Created an e-commerce mobile app using Flutter and GETX for state management, integrated with Firebase for backend functionalities like authentication, product management, and order processing.
- **Facebook UI Clone Application**
Created a mobile app mimicking the user interface design of Facebook, including features like news feed, profile viewing, friend requests, and messaging
- **Simple Money Management App**
Designed and implemented a straightforward mobile app for managing personal finances, featuring expense tracking, budgeting tools, and insightful financial reports.
